

Do It Yourself Kits

- Uses fewer nozzles/chemicals than comparable systems
- Free design and installation consultation
- Kits can be modified to meet your individual needs

Contact EcoMist today for more details, or to purchase your kits

BASIC **\$1,695.00**

Features:

20 Gallon Outdoor Deckbox
 Digital/Programmable Timer
 5 Gallon Chemical Tank
 600 PSI Pump - .5 Gallon/min
 200' High Pressure Tubing
 12 Stainless Steel/Ni Nozzles
 12 Slip Lock tees
 1 Slip Lock Three-way
 1 Slip Lock Hose Adapter
 2 Slip Lock End Plugs
 2 1.5" Nozzle Extensions
 1 Calcium Inhibitor Filter
 1 Quart Pyrethrum Concentrate
 1 Tube Cutters

Not Expandable

ULTRA **\$2,695.00**

Features:

48 Gallon Outdoor Deckbox
 Digital/Programmable Timer
 11 Gallon Chemical Tank
 1,000 PSI Pump - 1 Gallon/min
 300' High Pressure Nylon Tubing
 24 Stainless Steel/Ni Nozzles
 24 Slip Lock tees
 3 Slip Lock Three-way tees
 1 Slip Lock Hose Adapter
 2 Slip Lock End Plugs
 5 1.5 Inch Nozzle Extensions
 5 8" Nozzle Extensions
 1 10" Sediment Filter
 1/2 Gallon Pyrethrum Concentrate
 1 Tube Cutters

Expandable up to 50 Nozzles

PRO **\$2,995.00**

Features:

70 Gallon Outdoor Deckbox
 Digital/Programmable Timer
 25 Gallon Chemical Tank
 1,500 PSI Pump - 1.5 Gallon/min
 400' High Pressure Nylon Tubing
 30 Stainless Steel/Ni Nozzles
 30 Slip Lock tees
 4 Slip Lock Three-way tees
 1 Slip Lock Hose Adapter
 4 Slip Lock End Plugs
 10 1.5" Nozzle Extensions
 10 8" Nozzle Extensions
 10 Nozzle Swivels
 1 10" Sediment Filter
 1 Gallon Pyrethrum Concentrate
 1 Tube Cutters

Expandable up to 100 Nozzles

WHY ECOMIST?

What Separates EcoMist from the Rest

Mosquito/Insect Control Systems

Most mosquito and insect control systems are very effective but there are significant differences between EcoMist and other systems in the market today.

The EcoMist system has 3-4 times greater water pressure and 5 times smaller nozzles than other systems. This means that the mist produced is finer, lighter and evaporates more quickly producing a dryer result. Most systems produce larger droplets due to lower water pressure and larger nozzles which leave a wet, sticky residue on cars, patio furniture and walkways. This residue can also harm expensive landscaping due to increased insecticide absorption.

EcoMist provides advanced technology at a very competitive price. Due to the lighter spray, fewer nozzles are needed and the chemicals cover a larger area. This results in a lower cost for materials and chemicals than our competitors. EcoMist could save you approximately \$600.00 annually over other systems.

Advances in design, development and technology have produced a system that is almost invisible. Beautiful landscaping can be ruined with the pipes that most systems use protruding above the plant material. Our selection of nozzles (some the size of a pencil eraser), tubing and chemical tanks are all designed to work without being seen.

Our philosophy is that you don't need to see the components of your system to know that it is working. The results will speak for themselves when it comes to our mosquito/insect control mist systems

Cool Mist Systems

With more and more people building outdoor living spaces, cool mist systems are becoming more popular everyday. Customers are finding there are significant benefits of having evaporative misting system at their home or business. For example:

A cool mist system installed on your restaurants patio not only attracts more customers with its unique feature, it keeps them there longer, and spending more. Our systems open up tables that would normally be unavailable, because nobody wants to eat outside when it is 90 degrees.

A cool mist system is an essential addition to your new pool, or outdoor kitchen. Why have such luxuries if you won't use them because it is too hot outside to enjoy?

EcoMist Cooling Systems are the most reliable and technologically advanced systems available in the market today. All components are researched and rigorously tested before being offered to our customers. For example, EcoMist is the only company with a stainless steel, 360 degree directional swivel on its nozzles. This allows you to adjust the direction of the mist while the system is running. Our nozzles are equipped with an anti-drip adaptor, nozzle filter and interior nozzle propeller, which produce a wider coverage of the mist and a greater benefit to you.

Our pumps are specifically designed for our evaporative cooling systems. They create a high pressure mist, which has a "dry" feel. This cools the area without getting everything wet. EcoMist pumps are quiet, efficient and provide outstanding results for our customers.

EcoMist Cooling Systems will enhance your landscape and allow you to use your outdoor spaces on those dog days of summer.

We are committed to providing our clients with the best cooling systems available. Your satisfaction is our future.
